Education

Clemson University

M.S. Economic Analytics, GPA: 3.81

Clemson, SC

2025-2026

Research:

- **Latent Factor Analysis in Micro-Cap Equities:** Demonstrated that micro-cap excess returns are predictable when models account for non-linear relationships. Compared FF5, IPCA, XGBoost, and Autoencoder architectures, achieving predictive out-of-sample R^2 consistent with Kelly, Pruitt, and Su (2019) and Gu, Kelly, Xiu (2021).
- **Deep Learning for Environmental & Infrastructural Monitoring:** Applied Convolutional Neural Networks to multispectral drone imagery for forest health analysis in the Pisgah National Forest. Continuing summer 2026 with field validation and ground-truthing of remote sensing predictions. A GIS-Integrated Analysis.
- **More notable research available on Portfolio website or Github**

Relevant Coursework: Advanced Econometrics I & II, Game Theory, Advanced Data Analysis I & II, Machine Learning, Applied Data Science, Data Structures and Algorithms, Design and Analysis of Algorithms.

Clemson University

B.S. Economics | Minor Computer Science, GPA: 3.65

Clemson, SC

2022-2025

Professional Experience

MUSC | Information Systems Analyst

Remote

Jun 2024 – Present

- Identified and eliminated system inefficiencies, proposed and developed an automated activation request system, reducing manual work by 15 hours/week and eliminating human error.

Clemson University & BMW | Graduate Research Assistant

Clemson, SC

Aug 2025 – Dec 2025

- Led a quantitative research initiative to develop a stochastic risk-assessment model for autonomous robot implementation in BMW's Spartanburg factory.
- Responsible for Data Engineering and Risk/Expected Value Modeling.

Clemson University | ASC Tutor

Clemson, SC

Aug 2024 – May 2025

- Provided academic support in Intermediate Microeconomics, Intermediate Macroeconomics, Statistics, Financial Accounting, Managerial Accounting.

Clemson Rugby Foundation | Treasurer

Clemson, SC

Aug 2025 – Jun 2026

- Managed and modeled cost projections and balance sheet health for the foundation.

Skills & Interests

Technical: Python (Expert), SQL (Optimization), C++, R, Git, AWS/Cloud Deployment, Docker/Containerization.

Methods: Time-Series Analysis, Machine Learning, Game Theory, Financial Econometrics, Policy Analysis.

Interests: Spearfishing, Skiing, Marathons, Olympic Weightlifting, Rugby, Camping, Hunting, Gardening.
